Mass Pessimism

Returning home for a brief vacation, States Ambassador Dawson at London, England, describes the economic situation as one in which the peoples of the world are suffering from "mass pessimism."

What Ambassador Dawson says is unquestionably true, but before the prevailing pessimism became general the world was suffering from a condition which as it became intensified resulted in this "mass pessimism" which deplores and which now has a crippling effect on all efforts to improve conditions.

Without going too far, we find that conditions in Western Canada are such as to induce pessimism. Such a situation breeds pessimism not only in crop failures but in lack of water and pasturage for live stock. No one is right for the pessimism in the future, but the pessimism following as they do upon a short crop and loss at last year, and prices below the cost of producing what has been produced, have created an acute economic situation for a large section of our population. And the result is stagnation in agriculture, with an absolute cancellation of purchasing power, has reacted adversely upon all business with the result that unemployment has become intensified in all urban centers.

Such is the situation and it would be the height of folly to attempt to deny it or seek to minimize or ignore it. Such a situation breeds pessimism first among those who, even when victory is brought and encountered, always look upon the dark side of any picture, those who seem to be natural born croakers and fault-finders. And the most vicious of armors has been put on for bacteria to multiply and spread, for for some malignant disease to develop into an epidemic, so these habitual pessimists feel others not unusual as so incited but who because of their diffidence and losses are susceptible Mass pessimism is the result.

Yet it is uncalled for. It is utterly futile. It accomplishes nothing but to make the individual more downhearted and miserable than he or she would otherwise be, and to frighten and discourage others who might otherwise continue on the road of progress, and to increase the discouragement of many and in the dissipation of the prevailing glow.

In time of war there is no one thing which gives a wide general more comfort than the military. The morale of the army is the morale of the nation. Morale is broken and lost and the best drilled and equipped army in the world becomes a mob. Instead of being a threat to the enemy, it becomes a menace to itself. And the most victorious of armors has been put on for bacteria to multiply and spread, for for some malignant disease to develop into an epidemic, so these habitual pessimists feel others not unusual as so incited but who because of their diffidence and losses are susceptible Mass pessimism is the result.

It is the duty of people in their own best interests to curb their pessimism. We do not say they should minimize present difficulties, because they can keep their feet on the ground and not slip into a quagmire of despair. And now is the time to do it.

What is this mass psychology anomaly? It is simply a lack of individualism. The man stands on a street corner gazing up at nothing at all and soon he is surrounded by a crowd craning their necks looking at exactly the same thing. A man says things and he and the crowd he says it, he says it better than he ever before, doubtless shakes his head, buttons up his pockets, repeats the same story, and thus helps to make things hard when they are easy.

Be an individual. Be yourself. Stand out from and away from the mass. Think and act with your heart and an eye to the future. By no doing you will not be making conditions harder, but they will be discouraging others; on the contrary, you will find your own burden lightened, your outlook improved, your courage renewed.

Ranch Will Breed Cattle Alberta Oil Fields

Young Buffalo Bill shipped by B.C. Authorities To Peace River

British Columbia's first herd of cattle half cattle was expected to result from the shipment of a young buffalo bull from Beacon Hill Park to the Peace River district.

This animal is being presented by the city authorities to Mrs. Emily Crawford, pioneer rancher of the Peace River, for crossing with her cattle.

It will be the first buffalo crossing in this province outside a park, the Department of Agriculture here understands.

The cheagons of Mother Gray's Wax Extruder put it within reach of all, and it can be got at any drug store.

An Englishman has invented a table legs which adjust themselves to uneven floors.

When it comes to understanding Germany is to have a show factory with daily output of 10,000 pairs.

Dysentery is a Very Dangerous Bowel Complaint

Mrs. D. M. Ward, 607 Ave. H. South, Saskatoon, Sask., writes: "My husband and I were both taken with dysentery, and was in hospital over a year. I was on my feet for four times a year. I cannot emphasize the good results of Fowler's Bowel Regulator for me. It is a great relief to me. It is a great relief to me. It is a great relief to me."

"I cannot speak too highly of your excellent medicine. It is a great relief to me. It is a great relief to me. It is a great relief to me."

"I cannot speak too highly of your excellent medicine. It is a great relief to me. It is a great relief to me. It is a great relief to me."

A Provincial Pleasure Resort

The Opening Function of Lake Manitow Provincial Resort

Saskatchewan, making a definite bid to its prospective visitors by approximately \$300,000 spent to beautify the area, annually, has supplemented its aggressive all-weather policy by establishment of a Provincial Pleasure Resort in the heart of the most unique and attractive scenic and family resorts in the Dominion.

At 4, Hon. J. T. M. Anderson, Premier of the Province, officially opened the Provincial Pleasure Resort at the central building of the camp site which is situated on the shore of Lake Manitow, a lake of 1,000 acres, which makes the shores of Little Manitow Lake, renowned for its natural properties of its waters.

His Excellency, the Governor, in the direction the relief work has been conducted, and some members of the Cabinet, as well as a considerable number of the public, were present.

They were attending their annual convention at Regina, were present. There was a great gathering of people from almost every part of the Province and from outside points, and the occasion was in every respect a gala one.

This marked the establishment of a Provincial Pleasure Resort, the first of its kind in the Dominion, and the first of its kind in the Dominion, and the first of its kind in the Dominion.

It is a beautiful resort, the first of its kind in the Dominion, and the first of its kind in the Dominion, and the first of its kind in the Dominion.

Scientists Are Puzzled

Cannot Understand North Atlantic Being Still Free Of Icebergs

However gratifying the situation may be to steamship companies, scientists find the prevailing ice phenomena of the North Atlantic extremely annoying, in that they have been unable to find a satisfactory explanation for the conditions that govern these waters.

Leutenant-Commander Edward H. Smith, of the Coast Guard, an iceberg authority who plans accompanying the Great Zepherus on its projected trip to the North Pole this summer, has been unable to find a satisfactory explanation for the conditions that govern these waters.

He has predicted a normal season of about 200 icebergs in the North Atlantic.

Leutenant-Commander Smith expressed the belief that the bergs have not moved out into the Atlantic this year due to the absence of an "ice fence" which usually forms along the coasts of Labrador and Newfoundland and thence the iceberg barrier into the current.

But the mystery hangs on the absence of this "fence."

He said the bergs undoubtedly had slipped along these shores, and that the "ice fence" was not there.

H. Hillard, Coast Guard commander, said that the General Greene had been sent to look for the bergs, but that the mountains that broke up in this manner.

The opportunity was one of the most afforded for the study of icebergs, declared Lieutenant Smith.

The prevailing light was at sea in 1924, when only eleven were reported south of Newfoundland.

The heaviest month on record in April, 1912, when the Titanic sank in an encounter with one of the ice giants.

During that year 1218 bergs were reported and this number was only exceeded in 1910.

The international ice patrol, maintained by shipping nations of the world, was created as a result of the "Titanic" disaster.

Post Only One To Succed

Two Other One-Eyed Pilots Have Attempted Atlantic Crossing

Three one-eyed pilots have attempted to cross the Atlantic, but only one has succeeded.

The first was Francis Col, who had but one eye, started from France to fly to America with Charles Nungesser.

They were seen on record in April, 1912, when the Titanic sank in an encounter with one of the ice giants.

During that year 1218 bergs were reported and this number was only exceeded in 1910.

The international ice patrol, maintained by shipping nations of the world, was created as a result of the "Titanic" disaster.

H.B. Trail Shipments

Nothing But Wheat To Be Shipped Over Bay Route This Year

"Nothing will be shipped out of Hudson Bay this year except wheat," said Hon. H. B. Manion, Minister of Railways.

He said that the Department had decided the attitude of the department towards requests for trail shipments of cattle later in the year.

There would be difficulties enough in making trail shipment of wheat without entering into other projects, Dr. Manion said.

He drew attention to the lack of feeding facilities at Churchill as an example of the hindrance facing any attempt to ship cattle.

The Department had been busy with requests of that type but all had been refused.

Found and half pound tins at your grocers.

Depression Hits Icebergs Sea Otter Captured

On Pacific Coast

Not For Many Years Has There Been Anything Like Present Shortage of Icebergs

It takes quite a bit of water to make a sizable iceberg. No one who has seen one of these floating mountains of the Arctic zone would take this statement.

One ordinary iceberg carries enough coal to fuel a small steamship, and a large one would carry enough to fuel a battleship.

One of the most interesting facts about icebergs is that they are not all the same size.

Some are as small as a house, while others are as large as a city.

Some are as young as a child, while others are as old as the world.

Some are as beautiful as a flower, while others are as ugly as a wart.

Some are as fast as a cheetah, while others are as slow as a snail.

Some are as strong as a lion, while others are as weak as a kitten.

Some are as brave as a warrior, while others are as cowardly as a rabbit.

Some are as kind as a angel, while others are as cruel as a devil.

Some are as smart as a fox, while others are as stupid as a donkey.

Some are as happy as a clown, while others are as sad as a beggar.

Some are as rich as a king, while others are as poor as a rat.

Some are as famous as a star, while others are as unknown as a stranger.

Some are as powerful as a god, while others are as weak as a worm.

Some are as wise as a sage, while others are as foolish as a fool.

Some are as good as a saint, while others are as bad as a devil.

Some are as beautiful as a queen, while others are as ugly as a leper.

Some are as strong as a Hercules, while others are as weak as a baby.

Some are as fast as a cheetah, while others are as slow as a snail.

Some are as smart as a fox, while others are as stupid as a donkey.

Some are as happy as a clown, while others are as sad as a beggar.

Wheat Grading By Artificial Light

Would Eliminate Expensive Delays
Caused By Dull Weather

Because of the vagaries of old soil and the differences in the quality of natural illumination which he sends down on western Canada between Fort William and Vancouver, scientists in the National Research Laboratories at Ottawa, have been seeking an artificial substitute for natural light to be used in grading Canada's grain crop. In a report just prepared by Dr. D. C. Rose, on the experiments conducted, it is stated that "without doubt artificial lighting can be used in a satisfactory manner."

Lighting units devised in the Ottawa Laboratories are now being tested in the inspection office at Winnipeg. If they are found practicable it is believed that differences in grading between inspection offices will be reduced to a minimum and expensive delays caused by dull weather eliminated. It will be possible to grade grain throughout the twenty-four hours of the day.

"One of the main objections," says Dr. Rose, "and probably the only real objection to it, is psychological. Many individuals who are used to outdoor life and working under natural light find some discomfort in working in closed rooms using artificial light. A grain inspector's training with natural light has been so long and rigorous that a sudden change may cause real or imagined discomfort. This should be overcome to a large extent by keeping the inspection room as pleasant as possible, well and uniformly illuminated, well ventilated and, of course, at comfortable temperatures. Quite likely a considerable preference for artificial light would develop in inspectors who used it for some time. Many individuals who do a great deal of close work much prefer artificial light to daylight owing to its greater steadiness and the ease in locating the light where it is wanted."

Inspectors of the Board of Grain Commissioners at the various inspection offices compare thousands of samples of grain with standard grades established each grain year. Every carload and every shipload is graded.

Strength Of British Navy

Submarine Menace And Convoy
Weakened Effectiveness Towards
End Of Hostilities

That the British fleet towards the end of the Great War was so busy fighting the submarine menace, so occupied in providing convoys, that it was doubtful whether it could then meet the German high seas fleet even on terms of equality, is one of the arresting statements in the final volume of the official history of naval operations of the Great War, published recently.

The assertion came from Admiral of the Fleet, Earl Beatty. Towards the close of the war, Earl Beatty told the naval conference it was no longer desirable to provoke a fleet action such as the Battle of Jutland, even if the opportunity occurred. Such large contingents of the British naval forces were absorbed in the anti-submarine campaign. Earl Beatty told the naval chiefs, that he could no longer be certain of meeting the German fleet even on terms of equality, much less of superiority on the British side.

Sir Henry Newbolt, official naval historian, who writes the final volume and completes the work begun by the late Sir Julian Corbett, is convinced, however, the navy's convoy system won the war at sea.

London Has World's Biggest Meat Shop

But Few People Have Seen Smithfield
Market At Work

London possesses the biggest meat shop in the world. Everybody knows Smithfield, but few people have seen the great market at work. Ten thousand tons of meat and poultry are unloaded at Smithfield every week, and it is all brought to the market, sold, and removed to five thousand butchers' shops while London sleeps.

Smithfield market covers 10 acres. In it there are two miles of shop fronts and they have 15 miles of display rails on which meat of every description is hung. Real work begins at midnight. Then come hundreds of lorries rumbling through the streets from docks and railway depots. Smithfield, ablaze with light, is waiting for them. They know their places. Soon they are standing, with their backs to the pavement, in an immense fringe of lorries round the market, and the 1,600 porters fall upon them in organized ranks. The porters wear quilted caps which are a sort of combination of a cricket cap and a jockey's cap. Like their long white smocks, the caps are spotlessly white.

When all the meat is conveyed to the shops and exhibited for sale the butchers begin to arrive through streets which, though there is no sign of dawn, are as busy as Regent Street on a summer afternoon. A blaze of light shines through the windows of the taverns, a rattle of cups comes from the teashops, the clothier's where the porters get their caps and smocks is open, and a tobacconist stands at the door of his shop looking up at the stars.

Stalin a Good Compromiser

Takes One Step Back Instead Of Two
Advised By Lenin

In Moscow the iron-willed but supple-witted dictator, Josef Stalin, went back recently to the maxim of Lenin: "Advance three steps, retreat two, net gain one!"

Lenin's shrewdest retreat was his "Nep" ("New Economic Policy"), remarks the magazine "Time." Having found out that the state monopolies could not supply fast enough the goods which were absolutely demanded, Lenin retreated two steps in 1921 by admitting to Russia private, capitalistic traders nicknamed "Nepmen."

Two years after Lenin's death Stalin took three steps forward by abolishing Nep and stamping out Nepmen. He has now taken one step back and permitted correspondents to announce as blatantly as they like an experiment he has tried out quietly for some time in various parts of Russia; the state Nep.

It works this way: Side by side stand a state "trust" store and a state "Nep" store. A workman with a card entitling him to buy a pair of shoes can get them at the state trust store by standing in line all day, or, if the store has no shoes by waiting several weeks until shoes arrive. At the state Nep store, however, anyone can buy a pair of shoes instantly, with or without a card, but at a very high price.

To have restored the private Nepman (who also gave quick service at high prices) would have been to take two steps back. Stalin has taken one.

Wanted To Help

The husband drew up a chair beside his wife's sewing machine the other day and remarked: "Don't you think it's running too fast? Look out, you'll sew the wrong seam. Slow down, or you'll stick that needle in your finger!"

"Why, what's the matter with you? I've been running this machine for ten years."

"Oh, I was merely trying to assist you, just as you try to help me drive the car."

Both Well-Informed

Book Canvasser—Now, here is a book which I am sure will interest you, madam. "The Husband's Friend, or 500 Reasons For Staying Out Late."

Housewife—And what makes you think it would interest me?

Book Canvasser—Well, I happen to have sold a copy of it to your husband this morning!

Nothing great was ever achieved without enthusiasm.

Seek Tropical Valley

Party From Philadelphia To Search
For Hidden Valley In Northern
British Columbia

A search for hidden tropical valleys in the mountainous region of northern British Columbia, where rare biological and botanical specimens are believed to exist, is the object of an expedition headed by Dr. J. Norman Henry, which recently left Philadelphia for Canada.

The members of the expedition include Dr. and Mrs. Henry, H. G. McCusker, Canadian Government topographer, who has been loaned to the party to chart the region, about which very little is known; and Dr. Benjamin H. Chambliss, who will act as physician.

Travelling first to the Peace River country in northern Alberta, and then into the Peace River block in British Columbia to Fort St. John, the party will join 11 guides, headed by Stanley Clary, outfitter, of Entrance, Alberta, their pack train of 80 horses, and start on a 35-day trek northward to the confluence of the Toad and Liard Rivers.

Work Ahead Of Schedule

Elevator At Churchill Will Be Ready
For First Grain Shipment

Construction of the 2,500,000 bushel elevator at Churchill is ahead of schedule and there is no doubt that it will be all equipped and ready to handle the first shipment of grain out over the Hudson Bay line and by Hudson Bay by September 15, C. D. Howe, designer of the elevator, said upon his return to The Pas from Churchill.

Mr. Howe, who is head of C. B. Howe and Company, of Port Arthur, one of the leading elevator architectural companies on the continent, designed the elevator that is rearing its walls skyward along the bay coast lines.

Report Is Denied

Regina-Saskatoon Edmonton Air Mail
Not To Be Discontinued

Officials of the post office department denied reports that the Regina-Saskatoon-Edmonton branch of the western air mail route was to be disbanded after July 15. It was pointed out that this story, similar to one some time ago saying all the mail services were to be disbanded, was apparently based on the cancelling of the present air mail contracts in order to give the government an opportunity to review the situation. These contracts terminate at different dates, it was explained.

Oldest Foreign Patent

The oldest foreign patent of which there is a complete record is that for a pump granted to Galileo, the great Italian scientist and philosopher, while he was professor of Padua. He applied for this patent in December, 1593.

A Good Fish Story

The season's best fish story comes from Banff Springs, Alberta. A 20-pound trout in Lake Minnewanka, yanked an angler off a pier into the water, but the fisherman held on and with the aid of a police officer and a boat finally landed the prize.

Use Miller's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of the stomach which nourish worms, and these destructive parasites cannot exist after they come in contact with the medicine. The worms are speedily evacuated with other refuse from the bowels. Soundness is imparted to the organs and the health of the child steadily improves.

A writer declares that every single man makes a false step sooner or later. Thereafter, of course, he is known as a married man, says the Montreal Star.

Cubs of the American black bear are very tiny at birth, weighing less than a pound each.

Don't worry about the weather. There will be lots more.

HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets as millions of people know. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry the pocket tin of Aspirin tablets with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

Made in Canada

Keep Free From Fat--Feel Younger

Unlike most salts, Kruschen isn't simply a laxative—if that's all you want any kind of salt with any kind of a label will do—but is that all you want?

When you take Kruschen Salts you not only stimulate your bowels, liver and kidneys to function naturally and perfectly, but you supply every internal organ, gland, nerve and fibre in the body with nature's own revitalizing and rejuvenating minerals.

Get a bottle of Kruschen Salts at any drug store—take one-half teaspoon in a glass of hot water every morning before breakfast—cut down on sweets and fat forming foods and get some moderate regular exercise—in just a few days indolence changes to activity and life grows brighter.

A Virginia woman writes: "I just started on my second bottle of Kruschen Salts and have been losing flesh right along—you have fathomed the secret of flesh reduction."

Professor Finds Cure For Bone Infections

Larvae Of Green Bottle Fly Has
Remarkable Healing Properties

Physicians attending the 82nd annual session of the American Medical Association, at Philadelphia, were told that the larvae of the common green bottle fly has remarkable healing properties for bone infections.

Credit for this discovery, said to be one of the most thrilling in the annals of medical history, is given to the late Dr. William S. Baer, formerly clinical professor of orthopedic surgery at John Hopkins.

Realization that flies have a definite place of usefulness in medical science can be traced back to a shell hole on the western front during the World War.

After a week of heavy bombardment by German artillery, Dr. Baer, who was attached to an American medical unit, brought two wounded infantrymen to an advanced station. Both men had lain in mud for seven days and their shattered legs were infested with maggots.

The two men were placed in a ward with other wounded men, and, despite the presence of the maggots, it was noted that their wounds healed faster than those of other patients.

Dr. Baer wondered, and when he returned to civilian life he made an intensive study of maggots and decided to try them in the wounds of children suffering from bone infections. Some of the cases had been operated upon, yet it was noted that immediately after the injection almost unbelievable cures were effected.

Tinned Hams From Denmark

Danish Methods Of Marketing Sets
Mark That Is Hard To Beat

There is food for thought for the Canadian farmer in the recent arrival in the Canadian market of "tinned hams" from Denmark. When it comes to marketing its production, or overproduction if you prefer, the little kingdom of Denmark sets a pace which is hard to beat. Not only do they market their product in all the usual forms, maintaining the dominant position in the British market, but they are now processing their finest cuts, packaging them attractively, and making a strong bid for the larger consuming centres in our own Canadian market.

Canadian farmers should find an incentive to opportunity in the situation. A study of the fundamental principles underlying Danish methods might hold much of useful interest.

Suit Made In Record Time

Shear Sheep and Finish Suit In Three
Hours and 22 Minutes

In response to a challenge made by Sir Malcolm Campbell in a speech before the Bradford Rotary Club recently, a Yorkshire manufacturing firm and a Leeds tailoring firm have broken the time record in producing a suit of clothes.

Starting with the shearing of a sheep the suit was finished in three hours and 22 minutes. The previous record set in the United States in 1898 was six hours and five minutes. The suit was made to fit Rt. Hon. J. H. Thomas, secretary for the Dominion, who agreed to wear it at the Imperial Industries Fair, at Bradford, next month and later at the Imperial Economic Conference.

Couldn't Chance It

A man went to his doctor and requested treatment for his ankle. After a careful examination, the doctor inquired:

"How long have you been going about like this?"

"Two weeks."

"Why man your ankle is broken! How you managed to get around is a marvel. Why didn't you come to me at first?"

"Well, doctor every time I say something is wrong with me, my wife declares I'll have to stop smoking."

British Admiralty Gives Credit To Londoner

Invention Of R. H. Davis Saves Lives
Of Men Trapped In Submarine

Six men who escaped from the sunken submarine "Poseidon" apparently owe their lives to the invention of a Londoner, R. H. Davis, who provided them with what is described in effect as a "third lung" resembling a lifebelt with a gas mask attached.

It was designed to enable men trapped in a submarine to breathe freely until they had a chance to escape.

"It is twelve months since the apparatus was first served out as part of the equipment of submarine crews," Gorman Davis, the inventor's son, said. "It consists of a breathing bag carried on a man's chest and a buoyancy apparatus. To the bag is attached a cylinder of oxygen and the man inhales and exhales air which is being continually purified in the bag. With one of these bags it is possible for a man to live an appreciable time under water. Goggles are used to protect the eyes."

"If there is life aboard a submarine after she is sunk it is possible with this apparatus to escape to the surface no matter how deep the vessel may be."

"Pressure in one chamber must be raised—usually by flooding—until it equals that outside the ship. Then hatches may be opened and the men escape. Should they be injured or too weak to help themselves much, the apparatus is sufficiently buoyant to carry them safely to the surface and keep them afloat. Should there be other men alive in the "Poseidon" there still seems a chance that with this escape apparatus they may get free."

The Admiralty confirmed the fact that six men escaped by means of the Davis apparatus.

THE RHYMING OPTIMIST

By Aline Michaels

MUSIC AND MEMORY

The music weaves its vague enchantment here
Within the dimness of the lofty room.

Till once again I hear the lark's notes, clear

And high across June meadows sweet with bloom.

I see the white clouds drift and on wide slopes

The arabesques of shadow fleetly pass;

With restless fingertips the sunlight gropes

Among the thrusting emerald blades of grass.

Now memory and music intertwine; Though summer and the lark fled long ago,

Again loved notes, in these bright dreams of mine,

Go lifting up from flute and piccolo.

How strange, these wandering players have the key

To rooms I thought belonged alone to me!

For Biological Purposes

Several Thousand Live Toads Shipped
From China and Japan

Toad farmers of China and Japan, making another of their periodical contributions to the advancement of western science, are responsible for a shipment of several thousand live toads which recently arrived at Vancouver, B.C. The reptiles will be used in medical schools and laboratories for biological purposes. Encased in ventilated boxes partly filled with earth, the toads are capable of making the 7,000 mile journey without feeding, though they are watered frequently throughout the trip.

Zaro Agha, the ancient Turk aptly commented on the occasion of his first plane ride that he hadn't been so excited in the last 130 years.

CORNS

Lift off - No Pain /

QUICK RELIEF

Just a drop or two of Putnam's on any sore corn and out comes all the pain. The corn shrivels up and drops off. No scar, no pain, no pinching from tight shoes. You can dance or walk in comfort. Use only Putnam's Corn Extractor. Satisfaction guaranteed. Sold by druggists everywhere.

PUTNAM'S

Phosphorous under water is practically indestructible.

Aeroplane Prospecting

Areas In Northern Saskatchewan Will
Be Investigated

The aeroplane will be employed by Professor J. B. Mawdsley of the University of Saskatchewan in locating and charting mineral resources in Northern Saskatchewan. Areas which would otherwise be accessible only with much difficulty can be readily reached by the aeroplane route. Investigation of areas of schist and greenstone presenting favourable prospects for metallic minerals will be made.

Under instructions from the Provincial Department of Railways, Labour and Industries a survey of coal and clay deposits lying north of the Saskatchewan River is also being conducted by Professor W. G. Worcester of the Ceramics Department of the University of Saskatchewan and Walter Hastings, developing engineer. For some time these deposits have been known to exist but they have never been thoroughly investigated as to their extent, quality or commercial value.

The survey is being made with a view to developing this area if tests prove that development would be feasible.

Health Of Children Affected

Children Of Unemployed Men In
Montreal Show Effect Of
Malnutrition

The effect of the economic depression on the children of unemployed men has been revealed by the health service of financial federation, conducted by the Child Welfare Association of Montreal. Ninety per cent. of the children, who are being examined at the rate of 200 a week, are underweight, Miss Esther Belth, R.N., director of the Child Welfare Association, stated.

One child was found to weigh 24 pounds less than normal. Lack of nutritious food has also caused dental decay and clinics conducted by the association are busy doing what they can to halt the rot. A youngster of 13 had to have her entire upper row of teeth extracted, Miss Belth said.

Deportation Question

British Government Has No New
Information On Subject Of
Deportation From Canada

Rt. Hon. J. H. Thomas, secretary for the Dominions, was asked in the British House of Commons whether he had received any reply to the representations he said the British Government would make to the Canadian Government regarding deportation from Canada of British subjects who had become public charges in the Dominion, either because of unemployment or because they were suffering from disease.

The minister replied he was not yet in a position to add anything to his answer of April 21, when he had told the House the government was taking steps to get in touch with the Canadian authorities.

Muscular Rheumatism Subdued.—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until the skin is secured. There is more virtue in a bottle of it than can be fully estimated.

Have Completed Survey

Survey Made Of Proposed Mafeking
Cut-Off In Manitoba

Engineers of the Canadian National Railways have completed a survey of the proposed Mafeking cut-off in Manitoba, and have made a report to the minister of railways and canals. Sir Henry Thornton, president of the National road, told a special parliamentary committee dealing with railway finances. Hon. R. J. Manion, the minister, said he had not seen the report, nor was he aware of its recommendations, because it had been received by his department only a short time ago.

Operated On Himself

Internes At Philadelphia Successfully
Removed One Of His Tonsils

An interne at Philadelphia, Pa., attempted to contribute to scientific fields by removing his own tonsils. It has just been disclosed. Dr. Charles T. Meacham, of Petersburg, Va., a graduate of the University of Pennsylvania a year ago, succeeded in removing one of the tonsils and almost had the other one out when he became ill. Mirrors, a disc on his forehead and one on the wall, were used.

The interrogation point was designed from the shape of the human ear. It is quite futile to ask questions unless we lend an attentive ear to the answer.

Phosphorous under water is practically indestructible.

Little Helps For This Week

"Whoever will be great among you, shall be your minister; and whoever of you will be the chiefest, shall be servant of all. For even the Son of Man came not to be ministered unto, but to minister."—Mark x. 43-45.

What time we nurse our discontent Rather instead should we recall How once in servant's guise He went, Who was Master of us all; Nor any work, whereby was wrought The Father's will, too irksome thought. Need any be disquieted,

Whose heart this memory inclose? Who follows where the Lord hath led, What matter is it where He goes; For working with Him, side by side, The meanest task is glorified.

—Mary Bradley.
We cannot be too little to be like Him, nor so great as to work outside of Him."—Adeline D. T. Whitney.

Terrorists Are Sentenced

Mafia Terrorists In Italy Face Sentences Totalling 15 Centuries

One hundred and fourteen notorious Mafia terrorists face sentences totalling 15 centuries as a result of their conviction at a trial in Italy lasting almost a year.

Thirteen of the defendants got life, 16 got sentences of 15 to 25 years, 16 will be imprisoned ten to 15 years, and 69 will go to jail for one year. Fifty-seven others were acquitted.

The charges against the prisoners included 43 murders, 26 attempted murders, and many cases of assault, extortion, blackmail, shooting, robbery and bribery.

Persian Balm promotes daintiness, charm and beauty. Magical in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Cooling, caressing, it soothes and relieves all roughness caused by weather conditions. Delicately fragrant, it enhances the most finished appearance. Makes the skin rose-leaf in texture. Truly a peerless toilet requisite for every discerning woman.

Saskatchewan Cattle Shipments

One hundred head of Saskatchewan cattle went forward to the British markets the other day, 30 of which were taken from a feed lot within half a mile of Saskatoon. This is the first of several weekly shipments that will be made by the Saskatchewan Co-operative Livestock Producers Limited.

Took Pinkham Medicines

"I was always tired and I had severe pain at my periods. Lydia E. Pinkham's Vegetable Compound helped me. I took it before my two children were born and I am taking it now at the Change. I have also used Lydia E. Pinkham's Sanative Wash and found it a great relief for inflammation and for a discharge which bothered me." — Mrs. Caroline Dorey, 196 Head St., Simcoe, Ontario.

REPORT BENEFIT FROM

Lydia E. Pinkham's

Vegetable Compound

"What's Happened to The Light?"

We never miss the water until the well runs dry.
A faithful lamp, doing duty for many months in cellar or hallway, gives up the ghost. You flip the switch and when nothing results, involuntarily exclaim, "What's happened to the light?"
Suppose, however, that the trouble goes further than the lamp—that a flood wipes out the power station, or a severe storm blows down the wires.
What then?

Is industry crippled for lack of electrical service? Are the doors of mercantile establishments locked? Are streets left in darkness? No!
Interconnection, the linking of one system with another, is for just such emergencies. Immediately power is again available, interconnection means the protection of service against interruption.
It is just like having two or even three wheels to draw from.

The Calgary Power Company representative in your territory can procure for you any item of electrical equipment. He will tell you about the attractive terms upon which you can purchase many electrical appliances—with a small cash payment and the balance on your monthly light bill.

CALGARY

We notice in the postmaster general's report a suggestion that people writing letters should sign their full names and addresses to their letters and there would never be a letter lost that could be returned if it failed to reach the person it was intended for. The report suggests a better way than mere signature. That is to have a small card printed on the corner of the

envelope. This will cost only a trifle and if the letter cannot be delivered to the addressee, or the address should be wrong, the letter would come back to the source of its origin. It is a small card that would be returned if it failed to reach the person it was intended for. The report suggests a better way than mere signature. Town & District

Mr. and Mrs. A. B. Yates and family spent Sunday in Brooks.

Miss Olive Holland of Calgary, is spending two weeks holiday with her parents at Arrowwood Mr. and Mrs. N. Biddell.

Sunday evening about 50 cars were parked along the banks of the swimming pool at the east end of the fair grounds.

Many farmers and townspeople north of town visit Sunday picnicking on the banks of the Bow river south of Glenora.

Wheel went: it hot Monday, Res about Tuesday!

Everybody in town craned their necks last Thursday when an Auto-giro passed slowly over town headed for the Calgary air show. Some thought they were seeing thing after the night before.

A large number of people from Glenora motored to Calgary to attend the fair on Saturday. All said it was well worth while.

Beach galamias appeared at the lake Sunday. Getting up-to-date at the beach.

Signs should be placed on the main highway calling tourists attention to Glenora's pressure irrigation and inviting them to investigate it.

Besides being good for gardens to irrigation should increase the sales of boots and shoes.

Cliff Bogstie, the Glenora baseball pitcher left Sunday for Calgary where he is engaged to pitch ball for that town at a tournament to take place there this week.

Mr. and Mrs. J. W. Morrow and family of Graman spent the past week visiting friends in Glenora.

Bob Cardinal of the Bank of Commerce staff is at present away on his holidays.

John Koeford while operating a cultivator on his farm, last Wednesday.

Art Sanger of the Rockyford baseball team broke his little finger at the joint during the ball game with Glenora last Wednesday evening.

The cat swallowed a tin of candle.

"What happened?"

"She had a set-of-lean kittens."

Afternoon afternoon Campbell Evans of South Camp, entertained on his spacious lawn, a number of his golfing friends to a delightful buffet ice cream party.

A general meeting of the Glenora Community Hall Association will be held tomorrow night—Thursday—8 p.m. in the Hall. All interested are invited to attend.

Night Taxi Driver (shifting into high) "My Gosh! What a clutch!"

Voice from rear seat: "Say, you keep your eyes on the road. That's none of your business."

There will be no picture show in the Community Hall next Tuesday, July 28th, owing to the Chikitaque in town. But on Tuesday August 4th there will be one extra show, "The Millionaire."

Orden Lauch, age 13 of Queensdown broke his right arm above the elbow in the Glenora ball park last Wednesday morning. It was one of the most peculiar accidents in the annals of Glenora.

day was thrown off the machine and had his thigh bone broken. The accident happened about 9 o'clock in the morning. At noon when he did not come home for dinner the members of his family set out to investigate and found him lying in the field. Mr. Spotted is a man in his service time he was immediately taken to Glenora hospital and the latest report states he is doing as well as can be expected.

Ed. Gooder who was formerly on the staff of the Bank of Commerce Glenora spent a day visiting in town last week.

Brownie had a little hen. This hen was very queer. She laid like fun when eggs were cheap.

And quit when they were dear.

At last soft ball has made a start in Glenora headed by L. Michael who has elected himself president and appointed Geo. Evans as manager.

The first game took place Monday evening between the Roughriders and the Glenora team. The Roughriders came out with a score of 10 to 0.
